Software Engineering student with hands-on experience building full-stack web applications through academic, personal, and freelance projects. Experienced in developing responsive front-end interfaces, back-end systems, database structures, authentication, and API integrations. Familiar with JavaScript, Laravel, PHP, MySQL, Firebase, Tailwind CSS, and Flutter. Passionate about building clean, maintainable, and user-friendly applications while continuously improving through hands-on experience.

EDUCATION

Vocational High School — Software Engineering

Jan 2025 - Jan 2028

IDN Boarding School

Studying software engineering with a focus on full-stack web development, database systems, software architecture, and UI/UX design.

Building hands-on projects while developing practical skills in modern software development.

WORK EXPERIENCE

Full-Stack Developer & Project Lead

Dec 2025 - Present

Yayasan Al-Hidayah Lembah Hijau

Bekasi, West Java, Indonesia

- Led a 5-person development team in building a full-stack website for Yayasan Al-Hidayah Lembah Hijau.
- Developed front-end interfaces, back-end functionality, database integration, and application features based on client requirements.
- Designed and managed database structures using Laravel and MySQL.
- Coordinated development tasks, technical decisions, and project progress across the team.
- Communicated with the client to understand requirements and align the final product needs.

PROJECTS

OneSchool E-Report (School Project) [↗](#)

May 2026 - Present

- Developed a web-based academic reporting platform to support student report management and communication.
- Built responsive interfaces using HTML, CSS, and JavaScript.
- Integrated Firebase for data management and application functionality.
- Focused on usability, clear information hierarchy, and responsive design.

Notesku (School Project) [↗](#)

Apr 2026 - Present

- Built a full-stack note-taking application using Laravel and MySQL.
- Implemented user authentication and personal note management with CRUD functionality.
- Added archive, restore, search, and filtering features to organize and manage notes.
- Developed a responsive interface using Tailwind CSS and Alpine.js.

E-Library Platform (School Project) [↗](#)

Mar 2026 - Present

- Developed a full-stack digital library system using Laravel, PHP, MySQL, Tailwind CSS, and Alpine.js.
- Implemented authentication and role-based access for different users.
- Built book catalog, borrowing, and returning workflows.
- Designed database relationships to manage users, books, and borrowing records.
- Created a responsive interface for browsing and managing library resources.

Payroll Management System (School Project) [↗](#)

Feb 2026 - Present

- Developed a full-stack employee management and payroll system using Laravel, PHP, MySQL, and Tailwind CSS.
- Implemented role-based authentication for Admin and Employee users.
- Built attendance tracking and payroll processing workflows for monthly salary management.
- Designed database relationships for employees, positions, attendance records, and payroll data.
- Created responsive interfaces for managing employee and payroll information.

SKILLS

Front-End Development: HTML5, CSS3, JavaScript, Tailwind CSS, Responsive Web Design

Back-End Development: Laravel, PHP, REST API

Database & Cloud: MySQL, Firebase

Mobile Development: Flutter, Dart

UI/UX & Design: Figma, UI/UX Design, Prototyping

Tools: Git, GitHub, VS Code, Postman, Vercel, Netlify

LANGUAGES

Indonesian (Native proficiency) • English (Limited working proficiency)
